ESS7-2014, ed. 2.2 - Multilevel Data

Overview

Identification	ESS7MDHe02.2
-----------------------	--------------

Abstract

ESS Multilevel Data

The purpose of the ESS MD is to make it easier for the research community to analyse the ESS-respondents with reference to the context they live in.

There are numerous sources containing contextual data. The ESS MD does not contain everything available. The selection of variables is based on the recommendations in the report of the ESS Upgrade and Planning Group on Contextual Data: 'Conceptual and Statistical Issues in Multilevel Analysis'.

Citation Requirement

Users are obligated to refer to producer and distributor of the data by writing the following in forewords or footnotes of publications: "(Some of) the data applied in the analysis in this publication is based on the ESS Multilevel Data. The data is provided by [Original data source], and prepared and made available by NSD - Norwegian Centre for Research Data. Neither [Original data source] nor NSD are responsible for the analyses/interpretation of the data presented here."

Individual Level

The European Social Survey (ESS) is an academically-driven multi-country survey, which has been administered in over 30 countries to date. Its three aims are, firstly - to monitor and interpret changing public attitudes and values within Europe and to investigate how they interact with Europe's changing institutions, secondly - to advance and consolidate improved methods of cross-national survey measurement in Europe and beyond, and thirdly - to develop a series of European social indicators, including attitudinal indicators.

All respondents from ESS round 7 are included. The following topics are covered in the ESS Round 7 data:

- Media and social trust
- Politics
- Subjective well-being, social exclusion, religion, national and ethnic identity
- Immigration
- Health and Inequality
- Gender, Year of birth and Household grid
- Socio-demographics
- Human values

Country Level Data

Contains contextual information on all countries covered in ESS7-2014.

The country level data have been compiled from various well-known sources:

- Eurostat (<http://ec.europa.eu/eurostat/data/database/>)

- Crime: International homicide rate, Corruption Perceptions Index, Crimes recorded by the police, Prison population
- Immigration: Immigrants, Emigrants, Asylum applicants, Foreigners, Migrant Integration Policy Index, OECD International Migration Database

ESS Regional Level Data

Contains contextual information on all countries covered in ESS7-2014.

NUTS data have been compiled from Eurostat (<http://epp.eurostat.ec.europa.eu/portal/page/portal/eurostat/home>).

And the following topics are covered:

- Demography: Area of the region, Population size, Population density, Demographic balance and crude rates
- Economy: GDP per Capita, Unemployment
- Education: Number of Students
- Health: Fertility rate, Life expectancy, Infant mortality rate, Health workforce
- Crime: Crimes recorded by the police

For further information on the data and data sources, see the documentation of variable groups.

In case of any discrepancy between the data presented here and the data presented on the original data sources' websites or publications, the user should rely on the data presented by the original data source.
